STRATEGY

Beeviro's clients generating system, it isn't not just content. We transform targeted audiences into loyal customers through meaningful interactions, delivering real, measurable results.

VISION

To become the leading digital bridge between restaurants ,cafes , hotels and their customers, transforming dining into a smarter and more connected experience.

OBJECTIVES

Our mission is to simplify the dining journey by providing restaurants ,cafes , hotels and customers with an easy-to-use QR platform for seamless ordering, reservations, and delivery.

BRAND IDENTITY

tone of voice

Friendly & Approachable:

Make end customers feel it's simple and effortless to order or book.

Professional & Trustworthy:

Give restaurant owners confidence that the system is reliable and efficient.

Innovative & Modern:

Show that the solution is cutting-edge, not outdated or complicated.

Clear & Simple:

Avoid heavy technical terms; keep messages straightforward and easy to grasp.

Brand colors:

- green
- blue
- white

BUYER PERSONA

1. Trendy Café Owner

Profile:

- Age: 23–35
- Owner or Co-founder
- Location: New Cairo – Zamalek – Sheikh Zayed – North Coast
- Budget: Limited, but invests in trendy elements that attract young customers

Goals:

- Provide a modern experience for visitors
- Keep up with competing cafés using QR menus
- Create stylish designs that are easy to share on social media

Pain Points:

- Doesn't want to spend heavily on printing
- Needs a very simple solution (easy UI – quick setup)
- Afraid of technical complexity

BUYER PERSONA

2. Casual Dining Restaurant

Profile:

- Age: 30–45
- Owner of a medium/large restaurant
- Location: Downtown – Maadi – Alexandria – Mansoura
- Branches: 1–3

Goals:

- Prices change weekly due to inflation
- Printed menus are always outdated
- Staff are not tech-savvy → needs a simple “Drag & Drop” solution

Pain Points:

- Reduce operational costs from continuous printing and editing
- Offer bilingual menus (Arabic/English for tourists and expats)
- Gain analytics (most ordered dishes – peak times)

BUYER PERSONA

3. Hospitality Sector (Hotels/Resorts)

Profile:

- Age: 35–50
- Operations Manager or F&B Manager
- Location: Sharm El Sheikh – Hurghada – North Coast – Luxor/Aswan
- Large institutions (50+ employees, multiple restaurants within the hotel)

Goals:

- Deliver a premium, multilingual hotel experience (Arabic/English/Russian/German)
- Standardize menus across multiple in-house restaurants
- Enable real-time updates with no additional cost

Pain Points:

- Must provide services that match international hotel standards
- Struggles with multiple menu types (buffet – Asian restaurant – Italian restaurant)
- Needs a professional dashboard with analytics and reporting

PRICING EXAMPLES

1.software:

6 mounth: 3000EGP

Yearly: 5000EGP

2.products (stand)

Acrylic Stand 465EGP

Laser carved Beech wood cube: 425EGP

This SWOT analysis highlights the store's strengths, weaknesses, opportunities, and threats to guide your growth strategy.

SWOT ANALYSIS

Strengths

- Cost-effective solution for restaurants (saves printing and operational costs).
- Lower pricing compared to competitors while providing higher value.
- Free 1-month trial to encourage restaurants to test without risk.
- Continuous and responsive technical support.
- Enhanced customer experience through quick ordering, reservations, and delivery in one place.

Weaknesses

- Reliance on internet connection; weak network may disrupt usage.
- Some customers (especially older age groups) face difficulties scanning QR codes and using digital menus.
- Lack of integrated payment methods.
- Challenges in convincing small restaurants that are not accustomed to digital tools.

Opportunities

- Strong expansion in the foodservice sector with significant growth potential.
- Increasing shift towards digitalization and higher demand for QR menu services.
- Greater customer satisfaction through technology adoption.
- Multilingual support attracts both local customers and international tourists.
- Opportunity to stand out with a localized service: Arabic support and competitive pricing.
- Potential integration with local POS systems and delivery platforms.

Threats

- Strong local and regional competitors (e.g., Master QR, Foodics).
- Customer frustration with technical issues (Wi-Fi, phone signal, device compatibility).
- Cultural resistance from customers preferring traditional menus/service.
- Rapid changes in tech trends (need for continuous updates and improvements)

MARKET RESEARCH

1. Market Size & Digital Transformation in Egypt:

- The foodservice market in Egypt is estimated at USD 10.35 billion in 2025, and is expected to grow to USD 21.25 billion by 2030, with a CAGR of 15.47%. (Mordor Intelligence)
- Food delivery services have significantly increased in usage, adopted by 38.7% of the population, reflecting a clear digital shift and openness to restaurant technology. (Mordor Intelligence, Food Business Africa)
- Conclusion: There is substantial expansion in the local market, particularly in adopting digital solutions within the restaurant sector.

2. Market Trend Toward Digitalization & QR Menus:

- POS solution providers such as Foodics have experienced triple-digit growth in Egypt over the last three years, confirming that the market is undergoing major digital transformation. (Foodics)
- Digital menus (QR menus) have become a core part of modern cashier systems, with innovations like Foodics accelerating this trend. (Foodics)
- Conclusion: The shift toward digital ordering and payment solutions is clear, and QR menus contribute to higher customer satisfaction and retention.

MARKET RESEARCH

3. Competitive Landscape: Key Players in the Egyptian Market

A. Local Platforms:

- **Master QR (Cairo-based)** — Offers digital menus, multilingual support, analytics, free trial, and pricing starting from USD 5/month. (master-qr.com)
- Other platforms such as QR Code Menu Egypt, which target multiple sectors: restaurants, hotels, food trucks, and hospitals. (qrcodemenuegypt.com)

B. Key Features of QR Platforms (Global Benchmark):

- Real-time menu updates without printing.
- Multilingual device support.
- Fast, mobile-responsive interfaces.
- Analytics to track customer interactions.

C. Common Challenges (based on real customer feedback on Reddit):

- “QR code menus? Nah, I didn’t come to dinner to troubleshoot bad Wi-Fi... Watching my mom try to scan one is basically an Olympic event.” (Reddit)
- “I can’t open the menu website because I lack phone signal... I feel like I’m bothering staff.” (Reddit)

Conclusion: The Egyptian market has established local players and strong advantages, but challenges remain in user experience — especially regarding internet availability and digital readiness.

MARKET RESEARCH

4. Strategic Recommendations for Qrtably

- **Differentiation in pricing and local support:** Offer clear value — packages priced in EGP or SAR, Arabic technical support, and easy-to-use solutions.
- **Enhance User Experience (UX):** Ensure the system works without strong internet, implement fast PWA design, and provide clear, accessible messaging.
- **Integration Partnerships:** Collaborate with local POS providers (e.g., Foodics, Paymob) and restaurant equipment suppliers.
- **Awareness & Free Trials:** Create Arabic educational content on YouTube, offer discounts for first branches, or provide two free trial months.
- **Persona-Based Marketing:** Use visual campaigns on Instagram for cafés, analytical content for hotels, and participate in exhibitions like HORECA for direct outreach.

MARKET RESEARCH

5. Quick Conclusion:

- The Egyptian market is experiencing rapid growth in digital foodservice solutions, especially with the expansion of delivery services and the evolution of digital consumer culture.
- Existing QR platforms demonstrate clear viability but still face traditional challenges (internet reliability, user resistance).
- Qrtably can effectively compete by offering a localized, seamless solution with Arabic support and an enhanced user experience.

Competitors

This SWOT analysis highlights your competitors strengths, weaknesses, opportunities, and threats to guide your growth strategy.

Competitors List

- XtraMenu
- My-Menu.app
- Takka Smart Menu

COMPETITORS SWOT

XtraMenu

Strengths

- All-in-One Solution: Combines digital menu, online payments, WhatsApp orders, reservation management, and reports.
- Ease of Use: Arabic dashboard, flexible, and supports adding unlimited staff members.
- Brand Identity: Full customization with colors and logo → strengthens your brand.
- Comprehensive Payment Support: (Visa, MasterCard, Fawry, Instapay, Apple Pay...) → boosts sales conversion.
- Digital Marketing Integration: Fast-loading menu optimized for Google, compatible with Facebook/Instagram, and landing page optimized for ads.
- Flexible Plans with Competitive Pricing: Discounts up to 50%.
- Exclusive PWA App in the 3rd Plan: A branded app for your restaurant that enhances professionalism and customer loyalty.

Weaknesses

- **Dependence on the Internet (cloud-based): Any outage directly impacts the service.**
- **Limited Starter Plan: Does not support online or WhatsApp orders, which may reduce its attractiveness.**
- **Commercial Registration Requirement for Online Payments: Restricts accessibility for some small or newly established restaurants.**

COMPETITORS SWOT

XtraMenu

Category	Features
Digital Menu	Branded with the restaurant's name – multi-language – compatible with Google + Facebook + Instagram.
Application (PWA)	Branded application with no download required.
Smart QR Code	For the menu, tables, and offers.
Online Payment Methods	Visa, MasterCard, Meeza, Fawry, InstaPay, mobile wallets, Apple Pay.
Professional Landing Page	Compatible with Google and advertising.
Item Management	Options and add-ons.
WhatsApp + Online Orders	Fastest communication channels.
Full Menu Control	Edit prices/photos from a mobile phone or computer.

Category	Features
Visual Identity and Design	Custom designs and colors.
Order Types	Delivery, takeout, dine-in, reservations, pickup.
Reservations	Smart (date, time, number of guests, type of occasion).
Offers and Discounts	Multi-style.
Cost	1,200 - 4,000 EGP annually.
Dashboard	Arabic, easy, unlimited employees with different permissions.
Reports and Analytics	Best-selling items + most frequent customers.

COMPETITORS SWOT

My-Menu.app

Strengths

- A user-friendly digital menu suitable for small and medium-sized cafes and restaurants.
- Direct social media integration (Facebook, Instagram, WhatsApp).
- Electronic payment support (InstaPay & Vodafone Cash).
- Ability to divide the menu into special offers and a main menu.
- Customer review system + data saving for marketing.
- Free and easy-to-distribute QR code.

Weaknesses

- Does not include a POS cash register system or KDS for kitchens.
- Does not have advanced reports or powerful data analytics.
- More suited for small restaurants, not for hotels or large chains.
- Relies on manual payment (via external links) and not direct integration with major payment gateways

COMPETITORS SWOT

My-Menu.app

Category	Features
QR Menu	Create digital menus linked to a QR Code with full customization (logo, colors, images).
Online Store / E-commerce Store	An integrated online sales platform with the restaurant's own branding.
(POS) system	A complete cloud-based POS for managing sales and invoices.
KDS system	Kitchen Display Screens (KDS) to facilitate order tracking.
Queuing System	A customer waiting screen to display the status of orders.
Order Management	Support for WhatsApp orders + defining delivery zones + managing payment methods.
Printer Integration	Integration with thermal printers for printing invoices and receipts.
Languages	Support for 5 languages (Arabic, English, German, Dutch, Turkish).

Category	Features
Technical Support	24/7 technical support.
Additional Services	Advertising design, professional food photography, and marketing services.
Reports and Analytics	Sales tracking, order performance monitoring, and operational reports.
Ease of Use	A feature-rich interface that may be relatively complex for small restaurants.
Cost	\$150 - \$350 annually.

COMPETITORS SWOT

Takka Smart Menu

Strengths

- A digital menu that's easy to use and suitable for small and medium-sized cafes and restaurants.
- Direct link with social media (Facebook, Instagram, WhatsApp).
- Support for electronic payment (InstaPay & Vodafone Cash).
- The ability to divide the menu into offers and a main menu.
- A customer rating system + data saving for marketing.

Weaknesses

- No POS cashier system or KDS for kitchens.
- No advanced reports or powerful data analytics.
- More suited for small restaurants, not for hotels or large chains.
- Relies on manual payment (via external links) and not direct integration with major payment gateways.

COMPETITORS SWOT

Takka Smart Menu

Category	Features
Menu Display	A complete menu with the restaurant's name + logo + division (main menu + offers).

Category	Features
Customer Reviews	Display name, number, review, and date + data retention.
Cost	First month: Free (Free Trial). After the trial: Monthly subscription. Base Price: 600 EGP/month. Current Offer: 50% discount → Actual Price 300 EGP/month. NFC Acrylic Stand: 450 EGP.
Social Media	Add/edit links for Facebook, Instagram, WhatsApp, Google Maps, and phone numbers.
Menu Management	Activate/deactivate the menu + Last Order + visitor tracking + view reviews.
Control Panel	Add/edit sections, items, and offers.

COMPETITORS' CUBES PRICES

Brand	Price
takka (Wood-Acrylic)	450 EGP
smart mate (Wood-Acrylic)	400 EGP

MARKETING FUNNEL AND CAMPAIGN PLAN

This plan shows how we guide potential customers (parents, adults, teachers) step by step — from first hearing about us to joining and staying in our programs.

MARKETING FUNNEL

1.Awareness:

Goal: Make potential clients aware of the service.

how: Highlight the common problems restaurant owners, hotels, and cafés face, such as:

- Continuous printing costs.
- Order mismanagement and confusion.
- Tools: Paid ads – Awareness content.

2.Interest:

Goal: Generate interest in Qrtably's solution.

How: Showcase the value and benefits:

- Saving time and effort.
- Reducing costs.
- Improving customer experience.
- Tools: Posts – Reels – Price and feature comparisons.

3.Decision:

Goal: Convince clients they truly need the service.

How: Provide strong incentives:

- One free month upon first subscription.
- Seasonal discounts and offers.

4.Action:

Goal: Push the client to take actual steps.

Tools: Clear Calls to Action, such as:

- Subscribe now – Try for free – Book a demo.

5.Loyalty & Advocacy:

Goal: Turn clients into long-term partners.

How:

- Continuous follow-up.
- Free updates.
- Special discounts for existing clients.
- Exclusive offers for annual subscriptions.
